

POLAR RP03-RP04

Code: D00087

POLAR RP03

Code: D00150

POLAR RP04

**N.B.** The machines are supplied without electric / pneumatic plant to supply gas from the cryogenic tank to the root of CO<sub>2</sub> supply valves

**MAIN DATA:**

High cooling power up to 400.000 fr/h (feasible in particular working conditions)

**High cooling speed, with homogeneity of temperature, oxygen-free refrigerating environment, reduction of mechanical stresses on the crushed product.**

High thermal jumps up to 18/20°C approximately in a single passage.

Completely automatic management, (for safety purposes the presence of a controller to the operation is required at all times), the values of the incoming and outgoing temperature, the internal pressure, and the level are acquired in order to be elaborated according to the value of outgoing temperature of the crushed product demanded by the operator through a specific software.

HEIGHT MAX mm	WIDTH PITCH OF HOUSING mm	WEIGHT Kg	POWER PLANT BASE kW
4700	3000x3000	800	3+6
